SUMMARY

Software engineering graduate with **Excellent** standing (GPA 3.65/4.0) and three years building and operating production web products for clients. Works across the full stack of a single system: a **32-endpoint REST API** on **Java 17 + Spring Boot**, a **Next.js 16 / React 19 / TypeScript** front end, and two mobile clients in **React Native** and **Flutter** — designing the API contract, then consuming it from every client. Used to Git Flow, code review, CI/CD and generated API documentation. Looking to join a delivery team working with international clients.

EXPERIENCE

Freelance Developer — automated commerce & service provisioning platform 07/2023 – present

- Built a full-stack commerce platform for a client using **PHP 8, MySQL, Bootstrap, jQuery and REST APIs**, serving **200 customers** and **50 orders** per month.
- Designed an **automated provisioning pipeline** that creates and delivers the purchased service immediately after successful payment, removing manual handling entirely.
- Integrated a payment gateway with **real-time transaction reconciliation**; built revenue reporting for the client.
- Managed a multi-configuration service catalogue across multi-region server infrastructure at **99%** uptime; administered the Linux servers directly.

Technical Support Associate — Z1 Computer JSC 09/2025 – 10/2025

- Maintained and optimised the company website; diagnosed hardware and software faults to reduce downtime; applied AI tooling to automate internal workflows.

SELECTED PROJECTS

RapPhim WareHouse — multi-source API gateway 09/2026

- Backend on **Spring Boot 4.1 / Java 17 / Maven**: a versioned REST API (`/api/v1`) acting as an anti-corruption layer that folds two third-party sources with incompatible JSON schemas into a **single stable contract**.
- Performance via **Caffeine cache** to cut outbound calls; **Spring Actuator** health checks; **Bean Validation** at the boundary; unit tests on the web layer.
- OpenAPI 3.1** documentation generated from code by springdoc with a live **Swagger UI**; every response wrapped in a consistent `ApiResponse` envelope.
- Frontend on **Next.js 16, React 19, TypeScript 5, Tailwind CSS 4** with **HLS** playback. **Docker** images for both services, separate dev/production compose files, **GitHub Actions CI**. github.com/nguyenquocanhz/RapPhimWareHouse

RapPhim Mobile — two mobile clients on one REST API 09/2026

- Flutter / Dart**: an `ApiClient` layer unwrapping the response envelope in exactly one place and normalising every failure; **provider** drives pagination, infinite scroll, a 350ms debounce and a monotonic `requestId` that discards late responses; **HLS** playback, HTTP layer unit-tested with `MockClient`. github.com/nguyenquocanhz/rapphim_mobile
- React Native 0.86 / Expo SDK 57 / TypeScript**: **expo-router** file-based navigation across five tabs plus detail, search and watch screens; an in-app settings screen changes the backend address at runtime, persisted with `AsyncStorage`. **GitHub Actions CI** builds the iOS .ipa on a macOS runner.

QR Wallet — Android banking QR manager 07/2025 – 08/2025

- Written in **Java** on an **MVVM** architecture; **Room Database** for offline access, **CameraX + ZXing** for real-time QR scanning, **biometric authentication** and AndroidX Security encryption. Team lead of 5 — github.com/nguyenquocanhz/AppQRWallet

SKILLS

Languages	Java 17, C#, TypeScript / JavaScript, Dart, PHP 7/8, Python
Frontend	Next.js 16 (App Router), React 19, TypeScript, Tailwind CSS 4, Bootstrap 5, Vue.js, responsive UI
Backend	Spring Boot, Spring MVC, Bean Validation, RESTful API, OpenAPI / Swagger, Node.js, .NET & ASP.NET Core
Databases	MySQL 8, SQL Server — normalised schema design (ERD), stored procedures, indexing, query optimisation
Mobile	React Native / Expo (TypeScript), Flutter (Dart), Android (Java, Kotlin) — MVVM, Room
Delivery	Docker & docker-compose, Linux servers, Git Flow, code review, GitHub Actions CI/CD, unit testing
Principles	OOP, SOLID, design patterns, layered architecture, MVVM, caching, Agile / Scrum

EDUCATION & CERTIFICATION

HCMC College of Economics and Technology (HOTEC) — IT (Software Applications) 08/2023 – 03/2026

Full-time · GPA 3.65 / 4.0 · graduated with **Excellent** classification · TOEIC 575 (07/2024)
